

## Классический метод

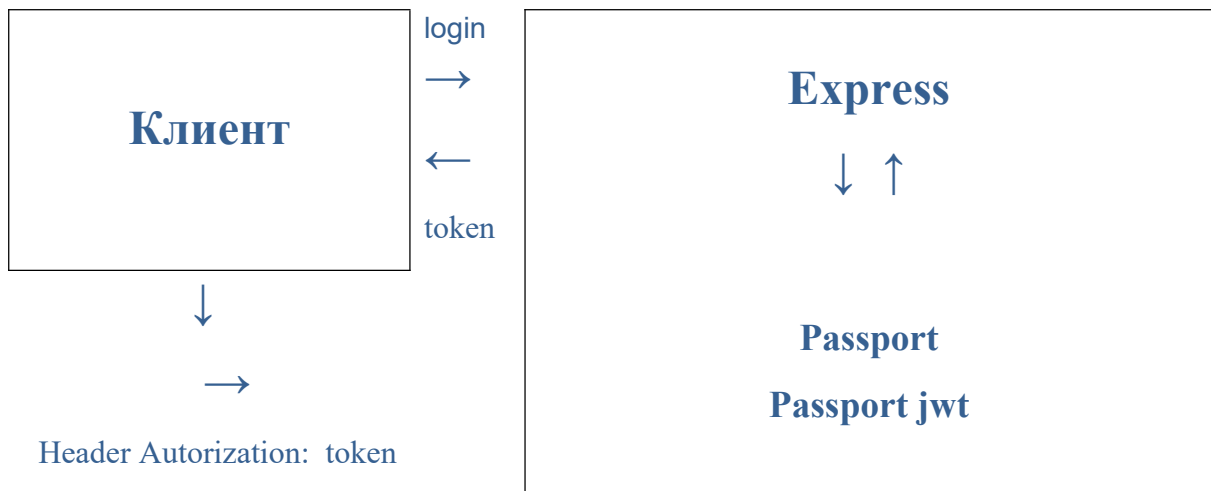

## REST

### Representational State Transfer

(передача состояний представления)

## Models

### Category

name

imageSrc

user

### Position

name

cost

category

user

### User

email

password

### Order

date

order

list:

name

quantity

cost

user

## Routes

Auth	Order	Category	Position	Analytics
/api/login(POST)	/api/order(GET)	/api/category(GET)	/api/position/:category(GET)	/api/analytics/overview(GET)
/api/register(POST)	/api/order(POST)	/api/category/:id(GET)	/api/position(POST)	/api/analytics/analytics(GET)
		/api/category/:id(DELETE)	/api/position/:id(PATCH)	
		/api/category(POST)	/api/position/:id(DELETE)	
		/api/category/:id(PATCH)
